

5. Attach the white 1x4 plate to the green Technic structure using the pins shown. The plate is positioned horizontally above the green structure, and the pins are used to secure it in place.

A LEGO Technic model of a car chassis. The base is a grey Technic beam with a yellow axle running through it. A black steering knuckle is attached to the axle. The body is constructed from red and green Technic bricks. A hand is shown holding the rear of the car, indicating it is being moved or tested.

[illegible]

10

A LEGO Technic Formula 1 car is shown from a side profile. The car is primarily green and yellow. The front wing is green with a large red number '6'. The chassis is yellow. The rear wing is red. The car has a large black tire on the right and a smaller black tire on the left. The driver is a minifigure wearing a white helmet and a red suit with yellow gloves. The car is set against a blue background.
